

# “CHLY980”, a TS980MPa Grade Cold-Rolled Steel Sheet with Excellent Formability\*

Hidetaka Kawabe\*\*

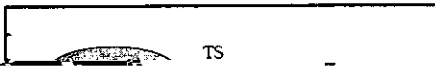

Norio Kanamoto\*\*\*

## 1 Introduction

Demand for high-tensile-strength steels is increasing because of improvement of crashworthiness and weight

in pressed parts, it may sometimes be important to ensure stretch flanging formability in addition to stretch formability, etc. in some shapes of parts. The hole
